WASTE RECYCLING

Rinse out food containers, bottles, and jars before recycling them to ensure they can be processed effectively.

Break down cardboard boxes to save space in your recycling bin and make the collection process more efficient.

- Use separate bins or containers for different types
 of recyclables like paper, plastics, metals, and glass.
- Clearly label each bin to avoid contamination
- and make sorting easier.

- Ensure items like paper and cardboard are dry before recycling. Wet or soiled materials may not be recyclable.
- Implement a schedule for regular waste collection and disposal to prevent overflow and unpleasant odours.
- about the importance of proper waste management and how to use the waste storage system effectively.
